6. Solve the problem using the number line: $3 \times 6 = \dots$

7. Solve the problem using the number line: $4 \times 5 = \dots$

8. Solve the problem using the number line: $8 \times 2 = \dots$

9. Draw an array to show the problem below. Solve: $6 \times 6 = \dots$

10. Show and solve the problem using equal groups: $4 \times 8 = \dots$

Ben weighs 7.6kg. His older brother is 3 times as heavy. How much does his older brother weigh?

Sarah bought 12 meters of fabric to make a patchwork quilt. If the fabric was on sale for \$6.29 per meter, how much did Sarah spend?

Tom buys 3 liters of yellow paint and 2 liters of blue paint. If the yellow paint is \$12.95 a liter and the blue paint is \$14.95 a liter, how much does Tom spend on paint?

Carlos needs to buy 6 pens and some colored pencils for school. He has \$25.00 to spend. If the pens cost \$3.50 each, how much does he have left to spend on colored pencils?

CONCEPTS

Subtraction begins from the ones column. If the subtrahend is higher than the minuend (see below), borrow 1 (=10) from the tens place.

	2	3	1	2
-		8		8
		2	4	

- Start by subtracting at the ones column, but how do we take 8 from 2?
- We then need to borrow 1 = (10) from the tens place. This process is called **regrouping**.
- Remember that the number 32 = 3 tens and 2 ones.
- We then take 1 tens from the 3 (30) and add it to the 2 in the ones place to make it 12.
- 12 - 8 is 4.

- Next, we subtract the tens column.
- Remember that an empty space means 0. So what is 2 minus 0? It is 2!
- Therefore, the difference between 32 and 8 is 24!

Subtracting 2-digit Numbers and 1-digit Numbers

62	39	82	32
30	9	30	2
60		80	
2		2	

41	92	78	46
90	2	70	8
40		6

Search Printable 4th Grade Division Worksheets Your students will take the next step to becoming math pros with these fourth grade division worksheets and printables! Now that your students are familiar with the basics of division, put their skills to the test with word problems, puzzles, drills, and other interactive activities. Mixed Multiplication And Division Worksheets without reminder and with reminder for preschool, Kindergarten, 1st grade, 2nd grade, 3rd grade, 4th grade and 5th grade Here you will find a range of problem solving worksheets involving multiplication. Each sheet involves solving a range of written multiplication problems. There are 3 levels of difficulty for each worksheet below: A, B and C. Worksheet A is the easiest level, suitable for children at the beginning of their grade. These printable one-step equation worksheets involve the multiplication and division operation to solve them. Given below are separate exercises for equations which involve integers, fractions and decimals coefficients. The pdf worksheets are meticulously designed for 6th grade, 7th grade, and 8th grade students. You can access some of them for ... Free grade 4 multiplication worksheets to help your students improve in Mathematics. Understanding column multiplication can be challenging, but it just takes practice! The steps involved must be taught in isolation and then students must work on it every day. These free multiplication worksheets will give your students the repetition they need ... Worksheets to teach students to multiply pairs of 3-digit and 2-digit numbers together. There are activities with vertical problems, horizontal problems, and lattice grids. Enjoy a variety of crossword puzzles, math riddles, word problems, a Scoot game, and a ... Free grade 4 division worksheets to save your time and help your students in Mathematics. These grade 4 division questions can be used to help students understand the steps involved in dividing large numbers, dividing by 10 & 100, division challenges and ... In grade 4, children spend a lot of time with multiplication topics, such as mental multiplication, multi-digit multiplication (multiplication algorithm), and factors. Here you can make an unlimited supply of worksheets for these topics.
